

RESPONSE OPTIONS TRAINING FOR WORKPLACE VIOLENCE

THE #2 REASON FOR FATALITIES IN THE WORKPLACE
IS HOMICIDE BASED ON BUREAU OF LABOR STATISTICS AND OSHA.

We have 3 Course Options for you to choose from.

- 2-hour workshop provides awareness and starts the conversation and critical thinking that needs to happen
- 4-hour scenario based learning and skills practice
- 3-day comprehensive classroom, scenario based training and skills practice

Course Overview

Statistics have shown us that the “old practice” of lockdown by itself is not a strategy that saves lives. We will teach you **NEW** strategies and options of a survivor’s mindset that will give you options when faced with life threatening attacks of violence in the workplace. Our team will explain, demonstrate and invite you to actively participate in scenario based drills where you will learn skills and options to protect yourself, communicate and help others.

Our **3 Day Course** will include what you need to know, have and do to create an effective Emergency Response Plan for the workplace. You will practice scenario based drills in your facility and learn to use the resources available to you. And finally, research shows us that the need for employees to be trained in advanced “Stop the Bleeding” techniques is critical in the outcome and survival of the injured. You will learn advanced first aid, in order to help yourself and others. Tourniquet training is an optional model in this course.

Celebrating 20 Years in Business! Serving New England Since 1998.

DID YOU KNOW?

- #1 Reason a women will die at work is homicide
- 4 of the 5 most deadly shootings have occurred in last 5 years.
